## Summary

---

Full Stack Web Developer skilled in Java | JavaScript | React.js | Spring Boot | REST APIs and MySQL. Experienced in building scalable, high-performance web applications across both front-end and back-end. Looking to contribute to impactful projects and grow in a dynamic, innovation-driven environment.

## Projects

---

### Student Result Management System

**Technologies :** Java, Springboot, Postman, SQL.

Developed a Student Result Management System using Java and Spring Boot to manage student records, marks, and results efficiently. Built RESTful APIs and tested them using Postman to ensure accurate data handling. Implemented features for adding, updating, and retrieving student results, improving data organization and accessibility.

### Fashion E-Commerce Website

**Technologies :** React, HTML, CSS, JavaScript.

Developed a responsive fashion e-commerce web application with dynamic product listings using Fetch API. Designed a modern, mobile-friendly UI and built reusable React components for scalability. Improved user experience through smooth navigation and interactive features.

## Skills

---

Java      React.js      Javascript      Spring Boot      RestAPI      Spring Security      SQL

Soft Skill

- Time Management
- Equally effective as a self-driven developer or a proactive team contributor.

## Work Experience

---

Internship as Java Fullstack Development. *(6 months)*

Completed a 6-month internship at Besant Technologies, gaining hands-on experience in Java Full Stack Development using Java, Spring Boot, React, and SQL. Built REST APIs, improved UI, and worked on real-time web application development.

## Education

---
